15 while Loop Questions

---

1. Input Validation - Age Check

Write a while loop that asks the user to enter their age. If the age is less than 0 or more than 120, ask again until a valid age is entered.

Example: -5 → 130 → 25

Valid input: 25

---

2. Repeat Until Vowel

Keep asking the user to enter a character until they enter a vowel (a, e, i, o, u).

Input: k → b → o

Output: "Vowel detected"

---

3. Print Squares of Numbers from 1 to n

Ask the user for a number n, and use a while loop to print squares of numbers from 1 to n.

Input: 4
Output: 1 4 9 16

---

3. Countdown Timer in Seconds
Ask for a time in seconds and simulate a countdown using a while loop.
Input: 5
Output: 5 4 3 2 1 Time's up!

---

4. Keep Asking for a Username Until Length ≥ 6
Use a while loop to ask the user for a username until they enter at least 6 characters.
Input: abc → bcda → abcded
Output: Username accepted

---

5. Find the First Number Divisible by Both 3 and 7 (from user input)
Ask the user for a starting number and keep incrementing it using a loop until a number divisible by both 3 and 7 is found.
Input: 10
Output: 21

INNOMATİCS
TECHNOLOGY HUB

---

6. Simulate ATM PIN Retry (3 Attempts Max)
Ask the user to enter their PIN. Allow only 3 incorrect attempts before locking the system.
Input: 123 → 000 → 456
Output: Account locked!

---

7. Keep Asking for Names, Stop if Blank
Create a while loop that keeps accepting names from the user. Stop the loop if they enter a blank string.
Input: John → Alice → ""
Output: Loop exited

---

8. Sum All Odd Numbers Till n
Ask the user for a number n. Use a while loop to sum all odd numbers between 1 and n.
Input: 10
Output: 25

---

9. Keep Printing Alternating Pattern "Yes No" Until Counter Hits 6

Output: Yes No Yes No Yes No

---

10. Take a String Input and Print Each Character Using While Loop

Input: "data"

Output: d a t a

---

11. Print the Table of Squares Until Value Exceeds 100

Start from 1, print the square of each number using a while loop until the square exceeds 100.

Output: 1 4 9 16 25 36 49 64 81 100

---

12. Keep Accepting Numbers, Count How Many Were Even

Stop the loop when the user enters -1.

Input: 2 → 3 → 4 → 7 → -1

Output: Even numbers: 2

INNOMATICS TECHNOLOGY HUB

13. Ask User for Marks Until They Score Full Marks (e.g., 100)

Input: 85 → 95 → 100

Output: Perfect Score!

---

14. Use While Loop to Remove All Vowels from a Word

Input: "pythonista"

Output: "pythnst"

---

15. Enter Items into a List Until the User Types "stop", Then Print the List

Input: apple → banana → stop

Output: ['apple', 'banana']
